

6 Ways RPM Helps Solve Pressing Healthcare Provider Challenges

Remote Patient Monitoring and Chronic Care Management resources and support:
care@vitalhealthlinks.com | 1-888-515-8450

To help offset the costs of rising hospitalizations, healthcare spending and patient disengagement, here are just a few everyday uses for remote patient monitoring:

New Challenges

81% of physicians feel overextended or at full capacity

People with chronic diseases account for **81%** of hospital admissions

86% of U.S. health-care spending goes to the treatment of chronic diseases

Up to **50%** of patients don't comply with medical treatment

60% of health systems rank improving patient outcomes as a critical priority

Disengaged patients are **3x** as likely to have unmet medical needs and **2x** more likely to delay medical care.

Smart Solutions

Remote patient monitoring provides physicians with cellularly-transmitted, physiological patient-data between clinical visits. Combined with coordinated care, RPM is a valuable compliment to your care plan.

It Includes devices like:

Weight Scales

Blood Pressure Cuffs

Pulse Oximetre

Blood Glucose Monitor

RPM real-time data enhances patient engagement. 20 mins of Care Coordinator coaching helps patients track & achieve wellness goals.

Patient Adoption, Clinical Results

50% of Americans supplemented care with telehealth visits in 2020+

29% Reduction in heart failure-related hospitalizations (NCBI)⁺⁺

24% of practices have RPM technology (American College of Physicians)

23M Americans used RPM in 2020; up from 7M in 2016⁺

43% of patients listed "greater convenience" as top benefit (MSI, June '21)

Ask our physicians about clinical, turn-key RPM and its uses.
